

MINI DELAYED EGRESS FOR MINIMUM SECURITY NEEDS

Mini Integrated
Delayed Egress Locks

1581S
Series

WHAT YOU NEED TO KNOW:

SDC's 1581S series mini delayed egress locks are designed to meet the needs of long term care and commercial facilities that require a smaller, less obtrusive, and less expensive delayed egress lock that is better suited for minimum security needs.

The 1581S series delays egress through perimeter exit doors for 15 or 30 seconds, alerts security and personnel to unauthorized egress, and is compatible with access controls and patient wandering and infant tracking systems.

In addition, the subdued alarm is less disruptive to patients and staff. SDC has also maintained all the features and status outputs found in most higher holding force delayed egress locks on the market.

A choice of operation mode allows users to meet their local code compliance while meeting all national and regional building and fire life safety codes, including NFPA 101, Special Locking Arrangements. All SDC delayed egress locks release immediately in an emergency.

FOR AIRPORT, PUBLIC FACILITY SECURITY & SAFETY AND LOSS PREVENTION

SDC's 1581S series mini delayed egress locks control pedestrian traffic in government, public facilities and transportation facilities, including airport jetways and tarmacs. The 1581S also provides theft protection of merchandise, technology and other valuables such as art and museum artifacts in stores, warehouses, art galleries, museums and technology facilities.

HOW YOUR CUSTOMER BENEFITS:

- Small, low profile - 10"L x 2"H x 2³/₈" D
- 650lb holding force
- Low power consumption, energy saver
- Integrated delayed egress magnetic lock
- Interlocking quick mount assembly
- Subdued alternating alarm
- Built-in activation trigger
- Adjustable door movement sensor
- Wandering patient, patient and infant tracking system compatible
